## Notes

### 1. Packages

The "VivaCollection" is a package of VivaCloud and VivaDesigner. There are different package prices with differing services. You can book VivaCollection monthly or annually according to your requirements.

With an annual booking you save 2 months' rent. The setup fee is also waived.

### 2. Users

Each package contains a maximum number of users. If more users are needed, you must upgrade to the next package up.

### 3. Data Storage

Each package contains a maximum data storage. If more storage is needed, you can buy additional storage space.

#### 4. Files/Folders

Within your data storage allowance you can manage any files and create folders in all packages. If required you can book further storage space.

#### 5. Roles

The VivaCloud possesses an extensive role and rights system. You can define your own roles. Depending on your package, you can use and configure standard roles (Sales, Friends, Family, etc.) or assign and configure your own role names. As well as the rights that a role has in the VivaCloud, you can also define which rights a member of a role will have in VivaDesigner.

#### 6. Design

You can use your own logo for the VivaCloud. According to your package, you can also assign a custom splash screen and define a URL on which users can log in. If your company's name is "123", your members would be able to log in on "viva.cloud/123".

#### 7. Status

With the status concept you can define your own statuses for files or folders and use the roles to define who may set or cancel these statuses.

#### 8. Assignments

With the assignment concept you can define neutral assignments/tasks or special assignments that relate to a specific file.

#### 9. Download/Upload

With the download and upload links, you can give users access to the data in the VivaCloud without them being members of the VivaCloud. Depending on the package, you can apply a time limit to the links or even define passwords for them.

#### 10. Additional Group

By default a group corresponds to a company which may possess several roles (Sales, Marketing, etc.). For service providers it may be sensible to steer several groups, so as to set up the VivaCloud for several customers/companies and to physically separate them.

#### 11. Distributed Publishing

With the option "Distributed Publishing" you can define access rights for VivaDesigner documents for every single role. Thus you can determine exactly which roles/users will have which options in VivaDesigner.

#### 12. Team Publishing

With the VivaDesigner "Team Publishing" option, several users can work simultaneously on one document.

#### 13. VivaCloud Forms

You can display forms in the VivaCloud that were created with the VivaNWP Designer. The maximum number of forms available depends on your package. You can also book additional forms.

#### 14. VivaDesigner

Depending on your package, ONE license for VivaDesigner for Desktop and/or Web is included (FE = Free Edition, CE = Commercial Edition, WE = Web Edition).

You can book VivaDesigner on the desktop and/or the Web Edition. The preparation of layout documents for the VivaCloud is generally made with the desktop version of VivaDesigner. This is particularly true if you want to import files from InDesign and at the same time use the desktop link for the images that were placed in InDesign. The license is linked to the workstation of ONE user.

Users who want to use the layout documents within the VivaCloud need the Web Edition. You must be a VivaCloud user and have the right to edit VivaDesigner documents.

For further licenses for the Web edition you have TWO license models.

##### Hours quota:

With the hours quota you have a flexible solution for the whole company. This solution is useful if you have a large number of users who only access VivaDesigner documents occasionally or whose user behavior is unknown.

The hours quota is available to all users of the VivaCloud who are permitted to edit a VivaDesigner document in the VivaCloud. It relates only to the use of VivaDesigner and not to the usage of the VivaCloud, which is unlimited.

You can buy an hours quota in several blocks of hours. An hours quota expires after one year unless it has been renewed. Furthermore, all hours quotas are cancelled automatically if the VivaCloud usage is terminated.

##### Flat rate:

With the flat rate you have a flexible solution to enable VivaCloud users to have permanent access to VivaDesigner documents without any time limit. This solution is useful if you have a large number of users who access VivaDesigner documents very often or over a longer period.

You can book the flat rate on a monthly basis. No termination is necessary. If for example you need a flat rate for four users for three months, you must order the flat rate 12x. The same is true if you need the flat rate for two users for six months. If the VivaCloud usage is terminated, all flat rates are cancelled automatically.

#### 15. VivaNWP Designer

If you want to define forms for the automatic creation of print material (business cards, data sheets, etc.) for the VivaCloud, you have to have the desktop version of the VivaNWP Designer. If VivaCloud users are to fill out forms, they must be users of the VivaCloud and have the right to edit forms.
